Professional Summary

B.Tech Computer Science student with hands-on experience in AWS, Docker, Jenkins, Terraform, Linux, and DevOps practices. Experienced in building cloud-native applications, CI/CD pipelines, monitoring systems, and AI-powered software. Built projects including IRIS, a local-first hybrid personal AI assistant, along with EC2 monitoring and DevSecOps automation tools. Interested in cloud infrastructure, DevOps, AI systems, and software engineering, with a focus on building practical and scalable solutions.

Education

B.Tech, Computer Science & Engineering - *BM College of Technology, Indore (2024–2027)*

Diploma, Computer Science & Engineering - *Govt Polytechnic College, Itarsi (2021–2024)*

Certifications

AWS Cloud Practitioner

Skills

Cloud & DevOps - *AWS, Terraform, Docker, Jenkins, Basic Kubernetes*

OS & Scripting - *Linux, Shell Scripting*

Monitoring - *Prometheus, Grafana, Node Exporter*

Version Control - *Git & GitHub*

Programming language - *Python*

Security - *Trivy*

Projects

1. IRIS – Local-First Hybrid Personal AI Assistant

- Built a modular personal AI assistant with Local, Cloud, and Hybrid execution modes
- Integrated AI model orchestration, persistent memory, voice interaction, tools, and GUI into a unified system.
- Designed a local-first architecture supporting both local and cloud-based AI execution.

2. EC2 Watchers – Real-time EC2 Monitoring with Telegram Alerts

- Created automated shell scripts to monitor CPU, RAM, and system metrics on AWS EC2 instances.
- Set up real-time alerts using a Telegram bot for instant notifications.
- Presented the project at MindCoders Hackathon 1.0 — a fun, fast-paced event to build real solutions.

3. MERN App Dockerized with DevSecOps Pipeline

- Dockerized a MERN stack application and built a Jenkins pipeline with automated testing and deployment.
- Integrated security tools like Trivy, SonarQube, and OWASP to scan for vulnerabilities early in the pipeline.
- Monitored app performance using Node Exporter, Prometheus, and visualized data with Grafana.

Hackathons & Achievements - *MindCoders Hackathon 1.0 - Built “EC2 Watchers” — a real-time cloud monitoring tool with Telegram alerts.*
